

PROJECT DATA

Project: Investa 260 Elizabeth Street
Project Location: 260 Elizabeth Street, Sydney
Project Description: 10 floor building

Client: Investa
Architect: Watermark Architecture
Blind Manufacturer: Verosol Australia
Supplier: The Emporium Australasia

Product Type: Ambience chain operated roller blinds using EnviroScreen 802 in colour black.

General Information

Building was refurbished to attract new tenants after long standing RTA occupancy.

Main Selection criteria

Verosol ambience roller blinds provide a robust blind hardware system suitable to all commercial applications.

Problem definition

The Investa building is open to all aspects

of the sun, west, north and east being the most problematic, where heat and glare are an issue. Occupant comfort was taken into consideration for this project.

Solution

EnviroScreen 802 has a shading coefficient of approximately 18%, which will provide the heat and glare solution for this project. EnviroScreen 802 also allows vision out for the occupants.
