

PROJECT DATA

Project: 39 Martin Place
Project Location: 39 Martin Place, Sydney
Project Description: Complete building refurbishment

Client: Built
Architect: PTW
Blind Manufacturer: Verosol Australia
Supplier: The Emporium Australasia

Product Type: Ambience chain operated roller blinds with 812 Semi Transparent fabric in colour Onyx.

General Information

Multi floor refurbishment of older builder to modernise the interior.

Main Selection criteria

A building that faces Martin Place needed a window solution that provided a performance blind with very good vision through.

Problem definition

Refurbishment criteria meant all internal window coverings were to be the same colour, having windows facing east, north and west meant heat and glare would be an issue.

Solution

812 semi transparent fabric has a shading coefficient of approximately 21% combined with the robust ambience roller blind system.
