Arguments in favour of choice made

Use of heavy duty 60mm Roller Blinds to accommodate large drops of up to 4100mm. SilverScreen selected to reduce heat loadings and glare levels.

Main selection criteria

Large Drops.
Heat Gain.

Problem definition

Exposed North, East and West Facades.
Window Heights over 3000mm AFL.

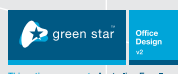

Requirements of client/architect

Individually controlled Roller Blinds to all perimeter windows on base building.
Reduce Heat loadings and Glare levels.

Solution

60mm Heavy Duty Ambience Roller blinds to accommodate drops over 3000mm. SilverScreen Fabric selected due to performance of fabric to assist in reducing heat/glare levels to help with occupant comfort.
