

PROJECT DATA

Project: CDOP4
Project Location: Brisbane
Project Description: Located within Coronation Drive Office Park, this city fringe office project incorporates over 16,000 sqm of PCA A grade commercial office accommodation

Client: AMP Capital
Architect: Nettleton Tribe
Blind Manufacturer: Verosol Australia
Supplier: KWA Blinds

Product Type: A selection of Verosol Mode and Ambience chain operated roller blinds were installed depending on fitout quality.

General Information

This building has achieved a 5 Star Green star design rating and incorporates innovative ESD principles that require commitment to the highest levels of sustainable management.

Main Selection criteria

SilverScreen fabric was selected because of the quality of tenants moving in to this prestigious Office building. Our client wanted to elevate any glare issues affecting its staff.

Problem definition

A northern facade proved the issue with the morning sun affecting workers within the building.

Solution

SilverScreen was an obvious choice for fabric for all levels keeping uniformity on the exterior of the building. Lower levels within the building were fitted with ambience rollers, whilst higher levels received mode rollers for quality fitout.

5 star rating

This rating represents Australian Excellence
