

PROJECT DATA

Project: Dandiiri Contact Centre
Project Location: Brisbane
Project Description: 6 Star Green Star Building

Client: QLD Police
Architect: Project Services
Blind Manufacturer: Verosol Australia Pty Ltd
Supplier: KWA Blinds

Product Type: Ambience Multi-link
Motorised Roller Blinds with Headbox.

General Information

Product was selected with Headbox, for its aesthetically pleasing look. 812 Almond metal backed fabric was chosen to match internal paint.

Main Selection criteria

812 fabric was selected because of the fabrics soft look, whilst still performing well in respect of heat reduction as one length of the building faces due west.

Problem definition

The longest facade of the building was due west and external shading devices didn't completely block out glare and heat.

Solution

Metal backed fabric was selected because of the high performance rating on heat reduction. The blinds are motorised for ease of operation.
