Arguments in favour of choice made

Verosol metal backed fabric was chosen to provide occupant comfort by reducing heat and glare while maintaining outside vision.

Main selection criteria

Heat and glare reduction.
Low emissions.
Energy efficiency.

Problem definition

Large office fit out with several
facades receiving direct sunlight.

Requirements of client/architect

Tenancy designed to optimise energy
efficiency and maximize natural lighting.
Verosol SilverScreen fabric provides
optimum glare reduction.
Metallised backing provides savings on
air-conditioning running costs.
Fabric is low VOC and formaldehyde free.

Solution

Mode chain operated Roller blinds with
spring assist.
Fabric Semi transparent SilverScreen in
Dark Grey.
