

PROJECT DATA

Project: Mercedes Dealership

Location: Cork, Eire

Project Description:

Car showrooms typically have very large glazing allowing the stock to be seen by passing traffic but at this dealership the glare and heat was causing discomfort to staff and customers.

The solution was to use 2m wide x 5.7m drop roller blinds with remote control electrical operation. This allowed staff to quickly and easily deploy the blinds when needed to make the internal environment more comfortable.

Requirements:

- Control of thermal gain
- Control of glare

Solution:

26 motorised roller blinds with SilverScreen fabric:

Light transmission 5%
Solar transmission 5%
