

PROJECT DATA

Project: Millennium Arts Project
State Library of Queensland
Project Location: Southbank, Brisbane
Project Description: New building construction - Library

Client: BCC
Architect: Donovan Hill Architects
Blind Manufacturer: Verosol Australia
Supplier/Installer: KWA Blinds

Product Type: Motorised Roller Blinds via Radio Frequency Timer Control.
Fabric: Semi Transparent SilverScreen
Quantity: 35

Arguments in favour of choice made

Verosol SilverScreen fabric was selected to provide suitable light levels and reduce heat providing occupant greater comfort and lower energy costs.

Main selection criteria

Heat and glare reduction.
Reduction in lighting and air-conditioning costs.

Problem definition

Large commercial development incorporating library.

Requirements of client/architect

Verosol Semi Transparent SilverScreen fabric provided reduction in direct sunlight and reduced dependency on air-conditioning and artificial lighting. Metallised backing provides savings on air-conditioning running costs. Motorised roller blinds to eliminate chains or cords as a safety issue in public areas.

Solution

Motorised Roller Blinds, Verosol semi transparent metallised SilverScreen in beige.
