

PROJECT DATA

Project: Siemens

Location: Frimley, Surrey, UK

Project Description:

In this project four campus buildings of Siemens UK headquarters required automated solar shading via a BMS.

Verosol motorised roller blinds were installed and linked to an Andromeda Telematics building management system. This ensured that the blinds were controlled based on the environmental monitoring of the site to maximise the thermal efficiency of the building.

Requirements:

- Control of thermal gain
- Control of glare

Solution:

800 motorised roller blinds with Trevira CS fabric:

Light transmission 6%
Solar transmission 6%
