Blind manufacturer: Verosol Australia Pty Ltd
Supplier / installer: Hugh Meagher & Assoc.

Products: 220 Verosol Mode Roller blinds
- fabric semi-transparent metal backed
SilverScreen in White, average size 2600 x
2200

Arguments in favour of choice made

Minimising unwanted Solar radiation and glare into the office interior.

Main selection criteria

Large wide width windows requiring spring assisted roller blind hardware enabling easy lift operation with a high performance blind fabric that minimises glare and maximises the view, while maintaining day time privacy.

Problem definition

Interiors requiring substantial protection from increased solar rays resulting in excessive heat load and disturbing glare issues. Occupants felt they were in a "fish bowl" due to a lack of privacy.

Requirements of client / architect

A high performance glare and heat control fabric operating on a superior quality roller blind that maintains day time privacy while retaining a view out.
White in colour.

Solution

Verosol Mode Roller blind with spring assist - fabric semi-transparent metal backed SilverScreen.
