Supplier / installer: Harvey Blinds

Products: Approx. 400 Verosol Mode Roller blinds complete with Verosol SilverScreen metal backed sunscreen semi-transparent fabric. Average size 1133 x 3300

### Arguments in favour of choice made

A smooth easy to operate roller blind hardware system.  
A high performance fabric that delivers superior heat and glare control that maximises interior comfort.

### Main selection criteria

Durable, easy to use roller blind mechanism and fabric that enables a view out, without compromising visual comfort.

### Problem definition

Prominent building with exposed facades. Interiors that required a high degree of heat and glare control from the sun's rays.

### Requirements of client / architect

Ensure worker comfort by keeping all occupants free from outside unwanted heat and glare while maintaining a view out.

### Solution

Verosol spring assisted chain operated Mode Rollers complete with Verosol high performing SilverScreen semi-transparent fabric.
