Project Description: Commercial office fitout 300 blinds / 3 floors

Client: Parsons Brinckerhoff
Architect: Incorp Interior Designs
Interior / Project architect: Incorp Interior Designs
Blind manufacturer: Verosol Australia Pty Ltd
Supplier / installer: Flexitrack Furnishings

Products: Mode Roller Blinds in Verosol Semi-Transparent SilverScreen 1200 x 2500.

Arguments in favour of choice made

Fabric's ability to significantly reduce glare and heat into the interior while maintaining a partial view out.

Roller blind hardware that allows for an effortless and smooth operation.

Main selection criteria

Semi-transparent fabric that offers significant heat and glare reduction.
Maintain the city scape view.
Smooth running roller blind hardware.

Problem definition

Office areas that are walled by floor to ceiling glass windows across all four facades which in turn receive sun from all aspects during the day.

Requirements of client / architect

Blinds must be easy to maintain.
Highly effective control of both heat and glare while maintaining the view.
2700mm drop requiring spring assisted chain roller blind hardware.

Solution

High performance Verosol Metal backed SilverScreen Semi-transparent fabric.
Verosol spring assisted Mode Roller blinds c/w stainless steel chain control.
